

Qazi Hammad ur Rehman

Software Engineering Student | AI & Python Developer
WahCantt, Pakistan | +92 318-5218521 | qazih5812@gmail.com

ACADEMIC OBJECTIVE

Software Engineering student at COMSATS University Islamabad, Wah Campus with a CGPA of 3.42/4.0, currently in the final phase of the 5th semester. Focused on Artificial Intelligence, Python development, and modern web technologies, with hands-on experience in building AI-powered applications, automation tools, and web-based solutions. Skilled in applying programming, problem-solving, and software engineering principles to develop practical and scalable systems. Interested in machine learning, intelligent automation, computer vision, and AI-driven software solutions for real-world applications.

EDUCATION

COMSATS University Islamabad, Wah Campus 2024 – 2028

Bachelor of Science in Software Engineering | CGPA: 3.42 / 4.0 | 5th Semester

Relevant Coursework: Programming Fundamentals, OOP, Database Systems, Artificial Intelligence, Data Structures & Algorithms, Computer Networks, Information Security, Software Engineering, Digital Logic Design, Web development, Mobile app development

Academic Performance: Sem 1 GPA 3.13 | Sem 2 GPA 3.66 | Sem 3 GPA 3.54 | Sem 4 GPA 3.36 | CGPA 3.42

TECHNICAL SKILLS

Languages:	Python, Java, C++, SQL, JavaScript, HTML/CSS
AI / ML:	Machine Learning, YOLO(Basic),
Backend:	Laravel ,SQL
Frontend:	HTML, CSS, Javascript,
Databases:	Xamp ,SQL
Tools:	Git/GitHub, Docker, Cisco Packet Tracer, VS Code, Google Colab, Anti-Gravity, claude code

ACADEMIC & TECHNICAL PROJECTS

Smart Doctor Connect AI — AI Healthcare Recommendation Platform 2026

GDG National Level Hackathon · FastAPI, React/Next.js, Groq AI, PostgreSQL · Healthcare-Tech AI

- Collaboratively developed a full-stack AI-powered healthcare platform that connects patients with doctors through intelligent symptom-based recommendations and appointment scheduling.
- Built RESTful APIs using FastAPI for user authentication, doctor discovery, appointment management, patient-doctor communication, and dashboard functionalities.
- Integrated Groq AI for symptom-to-specialization matching and intelligent doctor recommendation workflows with conflict-free appointment scheduling.
- Designed scalable backend architecture using SQLite and Supabase PostgreSQL compatibility with Docker-ready deployment structure.

Real-Time Classroom Mobile Phone Detection System 2025

Python, YOLOv8/v9, OpenCV, MediaPipe · Computer Vision · AI Engineering

- Designed and implemented an AI-based classroom monitoring solution capable of identifying mobile phone usage during live classroom sessions through advanced computer vision techniques.
- Integrated MediaPipe for hand and pose estimation with phone-to-student association logic using geometric matching and interaction analysis.
- Added real-time alerts, activity classification, automated logging, and optional monitoring dashboard support.

Airline Management System 2025

Semester Project · Java, MySQL · OOP & Database Systems

- Developed a desktop-based airline management system for staff operations covering flight booking, customer management, ticket cancellation, rescheduling, and boarding.
- Designed relational database integration using MySQL with Java-based GUI interfaces applying OOP design patterns.

Student Record Management System

2024

Semester Project · C++

- Developed a student management system with admin and user interfaces supporting add, search, update, delete, and authentication functionalities.

ACHIEVEMENTS & ACTIVITIES

- 1st Position, in MCW 4.0 in HITECH University
- 4th position in MTM — national-level hackathon.

LEADERSHIP & COMMUNITY INVOLVEMENT

Google Developers Group (GDG) On Campus

2026 – Present

Gen AI Team Member · CUI Wah Chapter

- Part of the Gen AI Team contributing to developer community events, AI workshops, and hackathons organized under the GDG On Campus chapter.
- Participated in collaborative AI and software engineering projects focused on healthcare, legal-tech, and intelligent automation systems.
